PROPOSED REVISION OF
REQUIREMENTS FOR THE DEGREE
MASTER OF SCIENCE IN EDUCATION (SCHOOL HEALTH)
AND
MASTER OF SCIENCE IN EDUCATION (COMMUNITY HEALTH)

The graduate program in the Department of Health Science has been in existence since 1951. This program was initially aimed at the education and professional training of master teachers and program coordinators for health education in school settings. Reflecting the increasing community demand for health educators in non-school settings and increased student demand for a degree program suitable for the community health educator, the Department of Health Science redesigned its course offerings in the late 1960's and 1970's and revised the requirements for the degree of Master of Science in Education (Health). This revision was designed as a compromise to make the degree appropriate for both the school health educator and the community health educator.

While this revision provided an immediate solution to a felt need, the Department has felt for several years that a clear division between school and community orientations in the degree programs was needed. During the 1976-77 academic year extensive consultations were held with the College administration, other departments and programs, students and former students, professional colleagues, programs at other institutions, and national professional associations. As a result of these consultations and continued planning activity within the Department during the 1977-78 academic year it was decided to revise the degree requirements to provide two distinct tracks with four common core requirements and three requirements specific to that track.

The revisions which are now proposed were called for in the Departmental Mission Statement developed during the 1976-78 academic year and are an outgrowth of the proposal in the 1972 evaluation of the Department's graduate program for the creation of a separate sequence of courses for the two degree emphases. These revisions are also in accordance with the urgings of the site visitation committee which reviewed this Department's programs during the 1975-76 academic year.

It is the purpose of these revisions to strengthen the graduate program in both areas -- school health education and community health education -- rather than simply creating a new degree for community health education.

Policies and procedures regarding advisement, comprehensive examinations, major papers, theses, oral defenses and competency statements for courses remain unchanged.

CURRENT DEGREE REQUIREMENTS

The current requirements for the Master of Science in Education degree offered by the Department of Health Science are as follows:

1) Required Courses

HLS 602	Philosophy and Principles of Health Education	3 hours
HLS 604	Mind-Body Relationships in Health	3 hours
HLS 609	Seminar in Research Problems	3 hours
PSH 683	Advanced Studies in Human Development	3 hours

2) Professional Electives — nine hours selected from among

HLS 620	Systems Analysis in Health	3 hours
HLS 621	Health Values	3 hours
HLS 631	Current Content and Concepts of Health	3 hours
