Chair, Business Administration and Economics

Re: Economic Analysis Corequisites Electives

As you know, Business Administration and Accounting Students must chose a quantitative analysis elective in order to satisfy the corequisite requirements of their degree. Students currently choose from the following courses ECN301, 302, 305.

Effective immediately, BUS461 (Production and Operations Management) may also be used to satisfy the corequisite requirement. Students in the Management track who use BUS461 as their quantitative analysis course may not count it as an elective in the management track.

We will document the change in the next catalog and publicize the change through the e-mail listserves that we maintain for our majors and intents.

We ask that the DARS system be updated as soon as possible to reflect the change; we understand this may take some time. As per Faculty Senate protocol, we have reported this minor change in elective structure through the distribution list below.
