Attached please find a revision in our graduate program. This increases the number of Application Science and Elective credits from 11 to 12. Most of our students so far have ended up taking 12 credits, as there is almost no scenario matching 11 credits. Students concentrating in a particular area of applications will have that information on their transcripts.

**Application Sciences and Elective Courses (11 12 credits)**

500 and higher-level courses from computational science, computer science, math, or application sciences.

1. Students do not have to limit their Application Sciences and Elective courses to one area.
2. Students who choose to concentrate on ONLY one area (X) of Application Sciences and Electives are considered to have a Computational-X concentration, subject to advisor’s approval.
