DEADLINE FOR SUBMISSIONS: FEBRUARY 23
Incomplete proposals or proposals received after the deadline may not be reviewed until next semester.

INSTRUCTIONS:
• Submit only complete proposals.
• Proposals must be prepared individually in Word format using committee guidelines (guidelines online).
• Fill out this cover page for each proposal (available online at www.brockport.edu/collegesenate) and insert it electronically as the front page of your document.
• Email whole proposal with cover page as one attachment to senate@brockport.edu and facprez@brockport.edu.
• All updates must be resubmitted to the Senate office with the original cover page including routing number.
• Questions? Call the Senate office at 395-2586 or the appropriate committee chairperson.

1. PROPOSAL TITLE:
Please be somewhat descriptive, for example, Graduate Probation/Dismissal Proposal rather than Graduate Proposal.
Revision of “Gerontology” minor to be titled, “Aging Studies.”

2. BRIEF DESCRIPTION OF PROPOSAL:
This proposal seeks to revise the requirements of the 18-credit Gerontology Minor and change the name of the minor to “Aging Studies.” New courses have replaced previous courses which are no longer offered by various departments within the College. This proposal also requests that administration of the minor be transferred from the department of sociology to the department of social work.

3. ANTICIPATED DATE OF IMPLEMENTATION: Spring 2007 semester/ASAP
Enter date this will be effective if passed by the Senate.

4. SUBMISSION & REVISION DATES: PLEASE PUT A DATE ON ALL UPDATED DOCUMENTS TO AVOID CONFUSION.

Executive Summary:

This proposal seeks to revise the requirements of the 18-credit Gerontology Minor and change the name of the minor to “Aging Studies.” New courses have replaced courses which are no longer offered by various departments within the College. This proposal also requests that administration of the minor be transferred from the department of sociology to the department of social work. Implementation is expected to begin during the Spring 2007 semester with the goal of having the revisions approved by Faculty Senate prior to the printing of the new undergraduate catalog.

Proposed Change #1—Course revisions:
Established by a faculty member in the department of sociology who retired from the College several years ago, many of the existing courses which comprised the minor are no longer offered. Thus, students who may have been interested in the minor faced the challenge of trying to locate appropriate courses and have them approved by the acting coordinator of the minor. Further, some required courses were not offered frequently enough for students to complete them in a timely manner. These issues have been remedied as the new coordinator of the minor has contacted a number of departments to 1) verify that aging-specific courses are still available and offered on a regular basis; 2) locate other courses which may be appropriate for the minor as requirements or electives. Permission has been received from the chairpersons of respective departments for previously approved and new courses. These departments include biology, nursing, psychology, recreation and leisure, social work, sociology, and women and gender studies.

Proposed Change #2—Name change:
The name “gerontology” is defined as the study of aging and related areas. Unfortunately, a majority of students are unfamiliar with the term and in fact, many academic institutions have started to change the names of their gerontology programs to “aging studies.” This terminology is more widely understood by undergraduate students and has helped to spark more interest in this area. As away to enhance student interest in the minor at SUNY Brockport, this proposal also seeks to change the “gerontology” minor to “aging studies” minor.

Proposed Change #3—Transfer coordination of minor to department of social work:
Various faculty members in the department of sociology have been kind enough to mentor the handful of students who have contacted them in relation to the minor over the past several years, especially Drs. Joan Spade and Jeff Lashbrook. When approached by the author of this proposal to consider shifting responsibility of minor to the department of social work, both faculty members were encouraging of the transfer. This author’s expertise is focused on aging-related issues and research and is committed to working with students to enhance their knowledge of aging issues through course work and field experiences at SUNY Brockport. Further, the department of social work has recently established the Center for Excellence in Gerontological Social Work whose goal is to provide education and research opportunities for students, faculty, and professionals in collaboration with community partners. Simply stated, this author is committed and prepared to take on the coordinating responsibilities of the revised minor.

<table>
<thead>
<tr>
<th>REQUIRED</th>
<th>4 courses plus 1 field experience</th>
</tr>
</thead>
<tbody>
<tr>
<td>SWO 476: Gerontology/ Aging Issues</td>
<td>Examines the impact of an aging American society on individuals, families, and society as a whole. Explores concepts and controversies related to bio-psycho-social elements in the aging process; service delivery for older adults, health care policy, caregiving, sexuality, end of life issues, and elder abuse.</td>
</tr>
<tr>
<td>BIO 281: Human Biology</td>
<td>Provides an introduction for non-majors to the human organism-structure, physiology, metabolism, behavior, genetics, evolution, and ecological relationships. Addresses important issues in health and human disease as well as current societal and ethical issues in readings, lectures, and classroom discussions.</td>
</tr>
<tr>
<td>REL 406: Leisure and Aging</td>
<td>Examines various aspects of aging as they relate to leisure in contemporary society, leisure needs of mature adults, services for elderly, and leisure pursuits in the subculture of the aging.</td>
</tr>
<tr>
<td>PSH 436: Psychology of Aging</td>
<td>Provides an overview of adult development, including genetics and longevity, sexual changes with age, cognitive processes and intelligence, social change, work and retirement, sex roles, moral development, mental health and mental disorders associated with aging.</td>
</tr>
<tr>
<td>Field Experience (independent study/BCEC)</td>
<td>This field experience is intended to provide a student with relevant interaction with older adults and service providers. It may be designed as an independent study course or as a BCEC (Brockport Career Exploration Course).</td>
</tr>
<tr>
<td>ELECTIVES</td>
<td>Choose 1</td>
</tr>
<tr>
<td>PRO 204: Developmental Assessment</td>
<td>Investigates the physiological, psychological, sociocultural, spiritual and developmental influences on the client. Emphasizes the use of multi-disciplinary tools in assessing clients along the age continuum. Examines environmental forces that influence developmental outcomes. Investigates variables which will promote the optimal stability for each of eight stages of life. Examines normal lines of defense for each stage to retain the greatest internal resistance.</td>
</tr>
<tr>
<td>SOC 465: Sociology of Aging</td>
<td>Provides information and theories about the social aspects of aging, including health, income, family relationships, role change, and social policy.</td>
</tr>
<tr>
<td>SWO 477: Perspectives on Older Adults and the Aging Family</td>
<td>Provides an in-depth analysis of select issues faced by older adults and their families using a multi-systems perspective and service learning activities. Bridging theory and practice, content utilizes a case study methodology to reflect practice-based situations encountered by health providers, older adults and their families. Topics include family caregiver/care recipient experiences, coping with loss/resiliency, advance directives/end-of-life decision-making, the impact of substance abuse on aging families, and elder abuse.</td>
</tr>
<tr>
<td>WMS 380: Issues in Men’s and Women’s Health</td>
<td>Analyzes and examines issues and needs related to the health care of men and women, from both an individual and societal focus. Includes men’s and women's changing roles and lifestyles, and traditional and non-traditional modes of health care. Covers these topics: sexuality, sexually transmitted diseases, abortion, birth-control methods, rape, battered women, eating disorders, substance abuse, depression, reproductive technology, pregnancy, healthy aging, health promotion, and interacting with the medical system.</td>
</tr>
<tr>
<td>SWO 372: Sex and the Life Cycle</td>
<td>Emphasizes sexual development through the life span with exploration of biological, psychological, societal, and political forces shaping, determining direction, expression, and lifestyle in positive sexual fulfillment; desensitization exercises for effective handling of feelings, attitudes; explores selected procedures for dealing with sexual problems.</td>
</tr>
<tr>
<td>BIO 495: Mechanisms of Aging (BIO majors only)</td>
<td>Aging is an inevitable phenomenon that all of us will face. In this course we will examine the biology of aging, i.e. the molecular, cellular, and physiological changes associated with aging and the mechanisms responsible for these changes. We will examine the research in aging in humans and in model research organisms, and what this research tells us about the mechanisms underlying aging and the possibilities of modulating aging with genetic and environmental interventions. We will also examine the evolutionary question, &quot;Why do organisms age?&quot;</td>
</tr>
</tbody>
</table>
1. Currently, there is one student who is actively pursuing the minor in gerontology. However, as the demand for knowledge about aging-related continues to grow and students begin to explore career opportunities in this field, the number of students registering for the minor is expected to increase. For the near future, this author does not perceive a significant increase in staff time to meet the responsibilities associated with the administration of the minor (i.e., advising students, assisting with field experiences, etc.).

2. While success of the minor is dependent upon various departments consistently offering required and elective courses, attempts have been made to select courses that are offered on a regular basis. For instance the departments offering the required courses have a strong track record of offering these courses at least once per academic year, if not more often. Further, the list of approved electives is robust enough to meet students’ needs in the event that one or more courses are not offered for a period of time.

**Academic administration commentary**

Academic administration has been very supportive of the revisions made to the minor. Guidance has been provided throughout the process including support from the Dean’s office (School of Professions) and Chairpersons from social work, sociology, and the other departments who have given permission to allow their respective courses to be part of the minor.

   1. Chairperson’s letter of recommendation (attached)
   2. Dean’s letter of recommendation (attached)

**Resources, facilities that may be needed to implement the program**

No new resources are requested to implement this revised minor. Given the small number of students currently enrolled in the program, minimal resources (i.e., coordinator’s time) will be needed.

   If appropriate, letters of support from cooperating departments, agencies, and etc.

See attached letter of support from Joan Spade, Chair, Sociology granting transfer of the minor to the social work department

See attached email communication from department chairpersons/faculty granting permission to utilize their respective courses as part of the minor’s requirements/electives.

**Impact on transfer students**

Due to low enrollment and focus on a minor rather than a major, proposed revisions to the gerontology/aging studies minor are not anticipated to have any effect on transfer students. Availability of all proposed courses may improve the likelihood of completing the minor in a timely manner—regardless of transfer status.

    School of Professions

RE: Aging Studies Minor

I have reviewed the proposal to create a minor in Aging Studies to be housed in the Department of Social Work and am in full support of this proposal. It fits well with the department’s goal of strengthening opportunities for students interested in working with senior citizens and meets a need not addressed by another department.

xc: Jason Dauenhauer, Assistant Professor
    Diane Dwyer, Chairperson, Department of Social Work

Memorandum

To: Faculty Senate
Undergraduate Curriculum Committee

Cc: Christine Murray, Dean

From: Diane Dwyer, Chair
Department of Social Work

Re: Aging Studies Interdisciplinary Minor

On behalf of the Department of Social Work, I am pleased to endorse establishing an Aging Studies Interdisciplinary Minor at SUNY College at Brockport. This course of study promises to broaden students’ knowledge about and competencies in dealing with older adults. Such a minor is clearly consonant with the mission of SUNY Brockport as it will undoubtedly enhance students’ ability to engage in an age diverse society. Demographic trends indicate that our society is aging at the local and national level. This minor will create an opportunity for students, from a variety of majors, to prepare to respond to these changing demographics as citizens and as professionals.

The Department of Social Work has an ongoing commitment to infusing its curriculum with aging-enriched content. This commitment ensures that the SWO 476, Issues of Aging in America, will be offered on a regular basis. Dr. Dauenhauer’s knowledge, research experience and passion about this subject area make him the appropriate coordinator for this minor and we are happy to support his efforts.

Should you require any additional information, please do not hesitate to contact me.
To:    Diane Dwyer, Chair, Department of Social Work  
      Eileen Daniels, Associate Dean, School of Professions

From:  Joan Z. Spade, Chair, Department of Sociology

Re:    Support of the Changes to the Gerontology (now to be called Aging Studies) Minor

Date:  January 30, 2007

This is written in support of the transfer of the Gerontology Major to the Department of Social Work. We are encouraged by the invigoration of this minor with a new name, Aging Studies, and are pleased to be able to support this minor with a course in Sociology of Aging. While we do not currently offer this course on a regular basis, we believe it is an important course for the campus and will do all we can to see that it is offered as often as possible.

Jason,

Concerning BIO 281, how many students do you anticipate will be doing the minor? I would like to get some feeling on how it would impact our enrollment in BIO 281.

Stuart wrote:

Stuart,

I've recently learned that the new undergraduate catalog is nearing completion and will be printed very shortly. Thus, I need to get courses finalized for the aging studies minor ASAP. Per my last email, I would very much like to have BIO 281 as a required course for the minor, but I'd like your permission to do so. I'll be on campus all day on Wednesday--my extension is 5506 if you have any questions or want to discuss further. Thanks again for your consideration as I try to pull all these pieces together.
