

Types of Presentations

Oral/PowerPoint Presentation

Presenters will have 10 minutes to speak from organized talking points or read from a polished paper about their scholarly project. They will have PowerPoint and Internet capabilities and be placed on panels of 6 or 8 presenters around common themes and disciplines. Presenters who want to be on panels together should indicate that preference in the “Other Information” section of the online proposal form.

Poster Presentation

Presenters will spend a 1 hour session standing next to their large-format poster (poster stands are provided), which describes their research project, and discuss their work with student and faculty passersby. Each poster will be placed near others of similar themes and disciplines.

Video “Poster” Presentation

Presenters will spend a 1 hour session standing next to their video “poster” and discuss their work with student and faculty passersby. The video “poster” is a still image or video about their work displayed on their own laptop or tablet computer or one of Brockport’s TVs. Each video “poster” will be placed near others of similar themes and disciplines.
